If you want to play in the world of cloud gaming, Vortex is a very easy to use and affordable option. It is a plug-and-play platform without the need for configuration via a web browser or mobile app for around ten euros per month. Visit Vortex.gg Vortex Cloud Gaming Principle At Vortex, cloud gaming is based on logging into your account to start playing as quickly as possible. You log in, choose a game from the available catalog and start playing right away! This is all done through a Vortex interface that takes you straight to the game of your choice. Cloud Games Catalog Vortex You don't install your games on Vortex, you choose them from the titles available in the catalog. Some games are included automatically (mostly free games), while others require the game to be in your Steam library. This is an advantage because you don't have to buy games specifically for Vortex if they're already on Steam. The advantage is that it doesn't take time to download and install before playing. The downside is that you can only play the games offered in the Vortex catalog. The catalog contains about 80 games for the cheapest formula for 9.99 euros per month and about 100 more games for more expensive formulas (18.99 and 19.99 euros) for a month). We invite you to browse the catalog on the Vortex website. A well-designed search engine allows you to quickly find out which games are available, free or not. Visit Vortex.gg Compatible Vortex Devices When it comes to compatibility, Vortex is strong because it can be used from within the Chrome web browser (only from the Vortex website)! So any device with a Chrome browser (version 60 and up) can be used to access Vortex cloud games. In addition to the Chrome browser, specialized applications are available: Windows 7, 8, 10. Android.MacOS. When it comes to connectivity, Vortex recommends at least 10Mbps (or 1.25Mbps). A better combination will always be more interesting. Pricing Vortex Vortex offers several plans, the first one costs €9.99 per month and no obligation for 50 hours. It is cheap and allows you to test the service without risk and without spending a lot of time. It should be noted, however, that the catalog of games in this formula is more limited, we invite you to visit the catalog. Visit the Vortex website The other two formulas will be tailored for those who want to play longer or take advantage of the entire catalog: Formula Pro for €18.99 per month allows you to play for 80 hours. Formula Ultra offers 140 hours of play for €27.99 per month. Note: By default, the subscription renews monthly. You will have to manually cancel your subscription to prevent it from renewing if you don't want to. Our Opinion on Playing Vortex Cloud Games Vortex is a simpler solution, but leaves less freedom of use than "Shadow" or "Paperspace", but allows you to enjoy cloud gaming at an affordable price (slightly less than £10). - per month. Vortex has limitations (large but enforced catalog, limited hours of play per month) that won't work for everyone. Still, it's a very good cloud gaming gateway that's easy to match. A big plus, except for the low onethere's the fact that you can play on Chrome, which opens up a huge gaming experience across platforms. If you can afford it, you can try it for a month to get an idea of what you can get as a gaming experience. Try Vortex Cloud Gaming When to choose Vortex? Vortex's advantages over cloud gaming competitors like Shadow or Paperspace are its low price and ease of use. Vortex is really very easy to use: you log in, select an available game and play! There is no need to manage the entire computer like Shadow or Paperspace. Whether you're looking for some quick fun or an easy and inexpensive way to try cloud gaming, feel free to give Vortex a try. If you want more freedom of use and the feeling of having a real remote computer, then "Shadow" or "Paperspace" are more interesting. These are more expensive and complex control alternatives, but they are more likely to meet these needs. Try Vortex Test Shadow Paperspace Review for Cloud Gaming
