I always give Hungry Jacks a chance because I like the idea of the shake and win but then I always keep ending up going to Maccas because this app becomes so infuriating, my girlfriend has no problem using the app and her phone is an iPhone 7 Plus yet it seems that because my phone is an iPhone SE (completely updated) there's some underlying problems that never get addressed. The Shake and Win barely ever works for me, only when it wants to and even then, half the time it will just freeze on the spin screen and count that as a spin before kicking me back out to the home screen of the app and I constantly get logged out even though I never log out myself it just does and then when I go to sign back in it says 'Unknown error' I really want this to work for whatever phone I or anyone might have and reading the reviews on here it seems like I'm not the only one, please Hungry Jacks if you see this, please fix this problem and address the problems with your app because there's lots of people who would come to your business instead of elsewhere simply because of the Shake and win feature and not to be rude but the McDonalds App always works and is constantly updated. I can deal with the fact that you don't take away the cost for taking meat out of a burger and McDonalds does but there's no reason your App shouldn't work as well if not better than theirs. Hungry Jack's: Deals & Delivery app may not be working for you due to some issues that your device may have or your internet connection problem. If you think that Hungry Jack's: Deals & Delivery app has an issue, please post your issue using the comment box below and someone from our community may help you. Also in the mean time you can try the fixes mentioned below. It is one of the most common problem in android operating system. Usually when you open an app, you will see a black screen for few seconds and then app will crash with or without an error message. There are few ways to fix this problem. Most of the times, it might be a temporary loading issue. You just need to press the recent applications menu (usually the first left button) in your phone. Then you close the app that has this issue. Now open the app again. It may work normally. Try Hard reboot in your Android mobile. Press and hold down the "Home" and "Power" buttons at the same time for upto 10 seconds. Then, release the buttons and hold down "Power" button until the screen turns on. Now you can try opening the app, it may work fine. If none of the above working, you can wait till your phone battery drains and it turns off automatically. After that put it to charge, and press the power button. It may work after this. Finally, if you can't fix it with anything, you may need to uninstall the app and re-install it. Android usually restores all settings after you re-install and log into the app. You can see if that fixes it. Even in some rare cases, the re-install step also don't work. If that is your case, try installing older versions of the app. Good luck! There are few situations that may cause the load issue in mobile apps. The Hungry Jack's: Deals & Delivery app server may be down and that is causing the loading issue. Please try after few minutes. Your wifi / mobile data connection not working properly. Hungry Jack's said the app created by Clemenger BBDO Sydney remained at the top spot for four days, and in the top five for the first month. It was the first of its kind to feature a nutritional calculator, enabling customers to access the protein, fat, sodium, and energy levels of Hungry Jack's menu items on the go. Customers could also check in to their local Hungry Jack's store to win vouchers including discounts and free food and drinks through the Shake & Win function. Hungry Jack's national marketing director, Jim Wilson, said mobile and social media is becoming an important focus within Hungry Jack's integrated marketing campaigns, intensifying customer engagement. "Even after almost two months on the market, we're still seeing around 4,100 downloads per day. Its phenomenal success will mean it will remain an important tool for rewarding our loyal Hungry Jack's customers," said Wilson. Hungry Jack's extended the app to be compatible with iPod Touch and iPad devices and in coming months it will be made available to Android users.
